

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A portable radio device comprising:

~~a flat lid having on a surface thereof a concave reflecting member having a predetermined curvature; and~~

~~a small size display device having an information display function for projecting light rays of a displayed image; and~~

a lid with a reflecting member for reflecting said light rays of said displayed image at an enlarged scale;

wherein said lid and said display device being adjustable in their positional relationship for applying light rays of a displayed image projected from said display device to said ~~concave reflecting member and reflecting the light rays at an enlarged scale from said concave reflecting member.~~

2. (original): A portable radio device according to claim 1, for use as a portable telephone set.

3. (currently amended): A portable radio device according to claim 1, further comprising:
a casing;

said ~~flat~~-lid being angularly movably coupled to an end of said casing by a hinge mechanism;

said ~~small-size~~ display device being positioned with respect to said lid such that when said lid is angularly moved and held at a given angle, said light rays of ~~a~~-said displayed image ~~projected from said display device is applied to~~ are reflected by said ~~concave~~-reflecting member and reflected at an enlarged scale from said ~~concave reflecting member~~.

4. (currently amended): A portable radio device according to claim 3, wherein said ~~small-size~~ display device is angularly movable for positional adjustment.

02
5. (original): A portable radio device according to claim 3, for use as a portable telephone set.

6. (currently amended): A portable radio device according to claim 3, wherein said ~~small-size~~ display device is mounted on said casing.

7. (currently amended): A portable radio device according to claim 6, wherein said ~~small-size~~ display device is angularly movable for positional adjustment.

8. (currently amended): A portable radio device according to claim 3, wherein said ~~small-size~~ display device is mounted on said ~~flat~~-lid.

9. (currently amended): A portable radio device ~~according to claim 1, further~~
comprising:

a display device for projecting light rays of a displayed image; and

a lid with a reflecting member for reflecting said light rays of said displayed
image at an enlarged scale; and

a casing; and

a module casing detachably connected to said casing;

wherein said lid and said display device being adjustable in their positional
relationship for applying light rays of a displayed image projected from said display
device to said reflective member;

wherein said ~~small-size~~ display device being mounted in said module casing, said
~~flat~~ lid being angularly movably coupled to an end of said module casing by a hinge
mechanism.

10. (currently amended): A portable radio device according to claim 9, wherein said
module casing has an external interface connector, and said casing has a connector which
electrically connects said casing to said external interface connector, said module casing being
~~structurally connected~~ attached to said casing by said connector.

11. (currently amended): A portable radio device according to claim 9, wherein said
~~small-size~~ display device is angularly movable for positional adjustment.

12. (original): A portable radio device according to claim 9, for use as a portable telephone set.

07 13. (new): A portable radio device according to claim 1, wherein said display device comprises a projection LCD.

14. (new): A portable radio device according to claim 1, wherein said reflecting member is concave.
